

September 4, 2005

Dear Frank,

We would like to thank you for building our dream house. Your attention to detail is self evident all around the house; that only comes with years of building quality homes. We believe that choosing you to build our home has been one of the best decisions we have ever made. When we began the process of building our new home, we were expecting a long and difficult process, dreading in fact the complications that many people told us might come up. We were amazed how our home took shape and in no time at all we were closing on our new home. We also appreciated the times where our input was requested when you thought of a modification to our plans. It was evident that we had the last say in any decision regarding our house. Your professionalism stands out and as we mentioned before we are very happy with the quality and workmanship in our new home. Since we have moved in, we have received many compliments on our home and even the neighbors were astonished at how fast your crew finished our house. Some even assumed that we had given you a bonus to finish the house ASAP. Words cannot really express how happy we are in our new home.....thank you.

Sincerely,

Mr. and Mrs. Sanchez
